

OSIS[®]

Online Environmental Surveillance

Protected by patent

Key benefits

- Designed to "Special Areas" requirements
- 24 hours a day surveillance
- Direct access to instant situation reports
- Estimated contamination area and volume
- Automated decision process
- Geographic sector indicators
- Easy user interface
- Worldwide internet access
- Near zero operating costs
- Linux Platform – Open software
- Prepared for production water monitoring

Reliability

- UPS backup installed
- Status of all instrumentation is logged
- Extensive backup of all data
- All data transmission is fully encrypted
- Tested technology approved to DNV specifications

Scalability

- Unlimited number of supervised offshore installations
- Unlimited number of sensors in cluster
- Unlimited number of user accounts

Partners and Contributors

- OSIS International
- Danish EPA under the Danish Ministry of the Environment
- Danish Energy Authority
- The Ministry of Science Technology and Innovation
- Aalborg University
- Technical University of Denmark
- DNV – Det Norske Veritas
- LIFE Environment

Real-time
monitoring of oil
spills from offshore
installations
